

REQUEST FOR BIDS  
STORM WATER DAMAGE REPAIR  
Issued: July 26, 2022

ADDENDUM 2

1. Looking at the general instruction number 5. It calls bid to be turn in on Monday August 4. Monday is August 1 so please tell us which date?
  - a. Bids are due 2 pm THURSDAY August 4, 2022.
2. Looking at the plans and it calls for a 30-inch ES-1 at the end of the pipe run. ES-1 is a concrete end section, and I don't know how you would want to connect it to the pipe?
  - a. An ES-1 is technically a flared end section, use a 30" HDPE flared end section
3. Also, the finished grade over the pipe is very steep and run-off is still come to this are so erosion will happen. You may need check dams and/or EC-3 to control this water
  - a. Yes, line the new grading with EC-3 to help with stabilization. (See Appendix B - Revised Site Plan)
